—

Because valerie_objects cares a great deal about sustainability, they've decided to re-use a considerable residual stock of polyethylene (PE). Hence this reedition of Five Circles, which consists of colourful circular trays that can be used as cutting boards too.

Where the original Five Circles contain both marble and PE trays, this retake will be produced in sets of 3 circles with the PE in the typical Muller Van Severen colours solely from our stock.

Due to limited and varying stock material, the thickness and colours of the three circles will remain a surprise until the very opening of the package. The material of the reedition already shows the patina of a material that has lived, which is characteristic for the soft texture of PE. That is ultimately the look that the designers had in mind when they chose this material for their design.
